Minuteman 2 Blender

The R&R Minuteman Blend System is the original proven performer, accurately blending fertilizer since 1982. Fast, precise blending with a compact foot print, the Minuteman 2 has a significantly lower horsepower requirement. The Minuteman 2 comes in 6, 8, 10, 12, 14 and 16 ton sizes.

Rotary Blend System

Here's an economical choice for today's competitive fertilizer market. This addition to R&R's line of quality blenders is built to the same quality standards R&R is famous for. The Chain Drive Rotary Blender and Torque Hub Rotary Blender come in 6, 8 and 10 ton sizes.

Bucket Elevator

R&R specializes in the manufacture of Bucket Elevators built out of heavy duty 304 stainless steel. Our pledge is to design, build and service the highest quality product of this nature. Our bucket elevators come in 90, 120 and 200 TPH sizes.

Stainless Steel Tanks

Crafted of heavy duty 304 Stainless Steel, R&R's line of cone-bottom tanks are perfect for your liquid fertilizer needs.

Field Loader

The R&R Field loader is the answer to your remote field loading needs. It is completely self-contained with a 20 h.p. Kohler gas engine, hitch, standard tires with suspension for highway towing and low inload height of 13". The field loader's standard size is 24" x 39'.
